Decreases 5 to 10 Million Lb

(491)

Increases Less Than 1 Million Lbs

Increases 1 to 5 Million Lbs.

Increases 5 to 10 Million Lbs

The origin of milk marketings remains highly concentrated, with 56 counties accounting for 50%

of the December 2013 California & Federal order (CA+FO) total.\* These 56 counties represent only 3.3% of the 1,716 counties with CA+FO milk marketings, and this number is down from 57 counties that comprised 50% of the total in December 2008. While each of the 56 largest counties marketed more than 53.372 million pounds, there were 849 counties (49.5% of the CA+FO total) that marketed less than one million pounds each in December 2013.

The top map on this page depicts 768 counties with increased CA+FO milk marketings, comparing December 2013 with 2008. Marketings from these counties totaled 11.110 billion pounds, with 48 counties increasing marketings by more than 10 million pounds. The map below depicts 1,145 counties with decreased marketings, and these counties marketed 3.623 billion pounds in

December 2013. Milk from all 1,716 counties with CA+FO order marketings totaled 14.733 billion pounds, an **increase** of 1.065 billion pounds (+7.8%) compared with December 2008.

Based On Data Provided By the California Department of Food and Agriculture

and all Milk Market Administrator Offices

California milk marketings included in this analysis totaled 3.402 billion pounds, or 23.1% of the CA+FO December 2013 total. The magnitude of milk from seven California counties with the most marketings - - over 196 million pounds each - - dwarfs a majority of all

1,145 Counties Decreased Marketings

1,145 Counties Decreased Marketings with CA+FO milk marketings in ascending order would require marketings from the smallest

1,482 counties (86.4% of the 1,716 total) to equal the amount from the seven largest California counties (2.927)

billion pounds). Not all of these
1,482 counties would be considered
small in terms of milk marketings, since
counties with up to 12.321 million pounds
would be included in this grouping. To put this
in perspective, 12 million pounds of milk is equal
to the monthly production from approximately
6,598 cows, assuming the U.S. 2013 annual
production average of 21,822 pounds of milk per cow.

Tulare County (CA), the largest dairy county in the U.S., marketed 950.6 million pounds of milk in December 2013. To equal this total would require the combined milk marketings from the smallest 1,197 counties, or all counties with marketings up to 3.651 million pounds.

<sup>\*</sup> CA+FO marketings included in this analysis represent approximately 88% of the total pounds of milk produced in the U.S. in December 2013.
