

PACKAGED FLUID MILK SALES IN FEDERAL MILK ORDER MARKETS:

**BY SIZE AND TYPE OF CONTAINER
AND DISTRIBUTION METHOD
DURING NOVEMBER 1987**

**DAIRY DIVISION/AGRICULTURAL MARKETING SERVICE
U.S. DEPARTMENT OF AGRICULTURE/WASHINGTON, D.C.**

Preface

This publication presents information relating to the containers in which fluid milk products are sold, and the methods of distribution used to market these items by handlers regulated under Federal milk marketing orders. These orders are established under the authority of the Agricultural Marketing Agreement Act of 1937.

This information in this report is based on a survey of fluid milk sales under Federal milk marketing orders during November 1987. Its purpose was to update a similar survey in November 1985, and to see if trends observed in past surveys are continuing. Data were obtained from milk handlers regulated under 43 marketing orders.

The data in this report are for volume weights of milk in 1,000 pounds. The number of each size of container can be approximated by dividing the weights shown in the report by the conversion factors shown in Appendix C.

This is the fifteenth report in a series. Similar data have been distributed based on surveys made in November 1963 through 1967, 1969, and every other year through 1985.

Issued July 1989

INTRODUCTION

Handlers regulated under Federal milk orders process approximately three-quarters of all the fluid milk products sold in the United States. In general, the sizes and types of containers, and methods of distribution used to market this production would be representative of the entire country. In addition, although these surveys are based on November fluid milk sales, the relationships shown would be representative in other months of the year. Two exceptions would be sales in half-pint containers and sales through school outlets which would not be applicable to sales in a nonschool month.

In general, the historical trend has shown a shift in fluid milk sales from glass to paper to plastic containers, from small to large containers, and from home-delivery to wholesale delivery.

DEFINITIONS

Type of Container. Containers are categorized by glass, paper, plastic, and metal cans. The paper category includes plastic-coated and wax-coated containers. Plastic includes rigid plastic containers, plastic pouches, and corrugated paper boxes or plastic containers with plastic linings. Containers larger than one gallon shown in the plastic column, for the most part, are bag-in-box containers. Metal cans larger than one gallon are included in the glass category. Subtotals shown under glass represent quantities of milk sold in glass and metal cans.

Method of Distribution. Sales are divided into home-delivery and wholesale. Home-delivery includes sales to homes or sales to others for delivery to homes. In some instances, home-delivery may include minor sales to institutions and vendors. Wholesale includes all sales other than home-delivered. Wholesale is broken down into chain stores, institutional outlets, and all other.

Chain stores are defined as 11 or more stores (supermarket, dairy, or convenience) nationwide, primarily engaged in food retailing, and either being under common management, being franchised by a common company, or belonging to a common purchasing association. Chain stores are categorized into supermarkets or dairy and convenience stores. Also identified are vertically integrated chain stores. A chain of stores is vertically integrated if the fluid milk products sold in its stores are processed by a plant owned by the chain.

Institutional outlets are military installations and schools (elementary, high school, colleges, and universities). All other wholesale outlets include nonchain food stores, nonfood stores (drug stores, gasoline stations, etc.), restaurants, hotels, hospitals, nursing homes, vending machines, and any other type of wholesale outlet.

HISTORICAL PERSPECTIVE

There has been a significant historical change in the types and sizes of containers in which fluid milk products have been sold and in the methods of distribution used to sell these products. The trend has been from glass to paper to plastic containers, from small to large containers, and from home-delivery to wholesale delivery. Some factors often cited in explaining these trends are: changes in consumer preferences and life styles; significant changes in the costs of packaging materials and delivery systems; technological developments in the container industry, particularly containers produced from by-products of the petroleum industry; and the increasing market share of supermarkets which brought about an additional handling of fluid milk containers by consumers.

In the first survey taken in 1963, sales of fluid milk products in glass containers accounted for about 32 percent and plastic accounted for 15 percent of the total. In the most recent survey, two-thirds of fluid milk products were sold in plastic containers, about one-third in paper containers, with less than one-half percent remaining in glass containers.

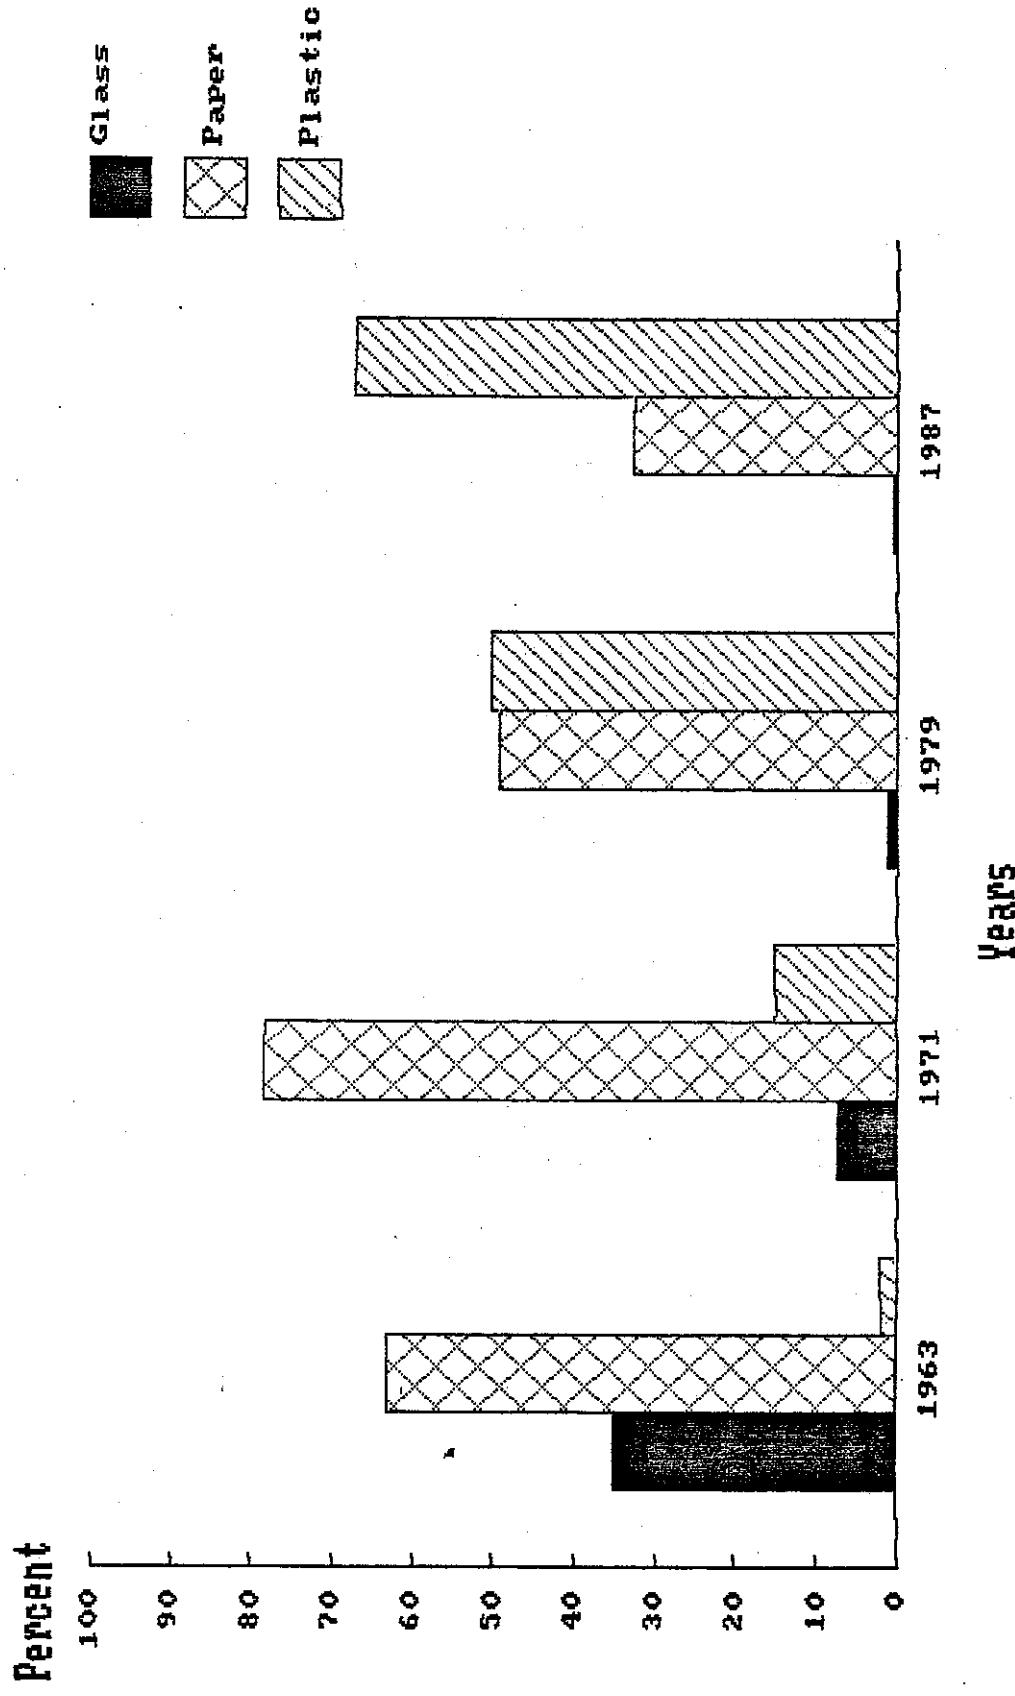

In November 1987, slightly over 60 percent of fluid milk sales were made in gallon containers. This market share has more than doubled since 1971 and is nearly five times greater than the share found in the 1963 survey. This increase has come at the expense of half-gallons for which the market share has dropped from 56 percent of total sales in 1963 to 21 percent in 1987, and at the expense of quarts whose market share decreased from 15 percent to 5 percent during the same time period.

The importance of home-delivery of milk has decreased with every survey that has been taken. Since the first survey in 1963, the market share has dropped from about 30 percent to 1.2 percent in 1987.

Surveys made prior to 1977 categorized all methods of distribution other than home-delivery as wholesale. Since 1977, information on the following types of wholesale distribution have been surveyed: food chain stores; supermarkets and dairy/convenience stores; institutional outlets--military and schools; and all other wholesale. Sales of fluid milk products in supermarket chain stores continued to be the predominate method of wholesale distribution with over 51 percent of the market share in the most recent survey, down slightly from 53 percent in November 1985. Along with information from other sources in earlier years, this marks the first time in nearly 20 years that supermarkets have not shown a market share increase. Convenience store's market share increased for the first time in eight years in 1987. The "all other" category, of which nonchain food stores are the larger proportion, remained unchanged from 1985.

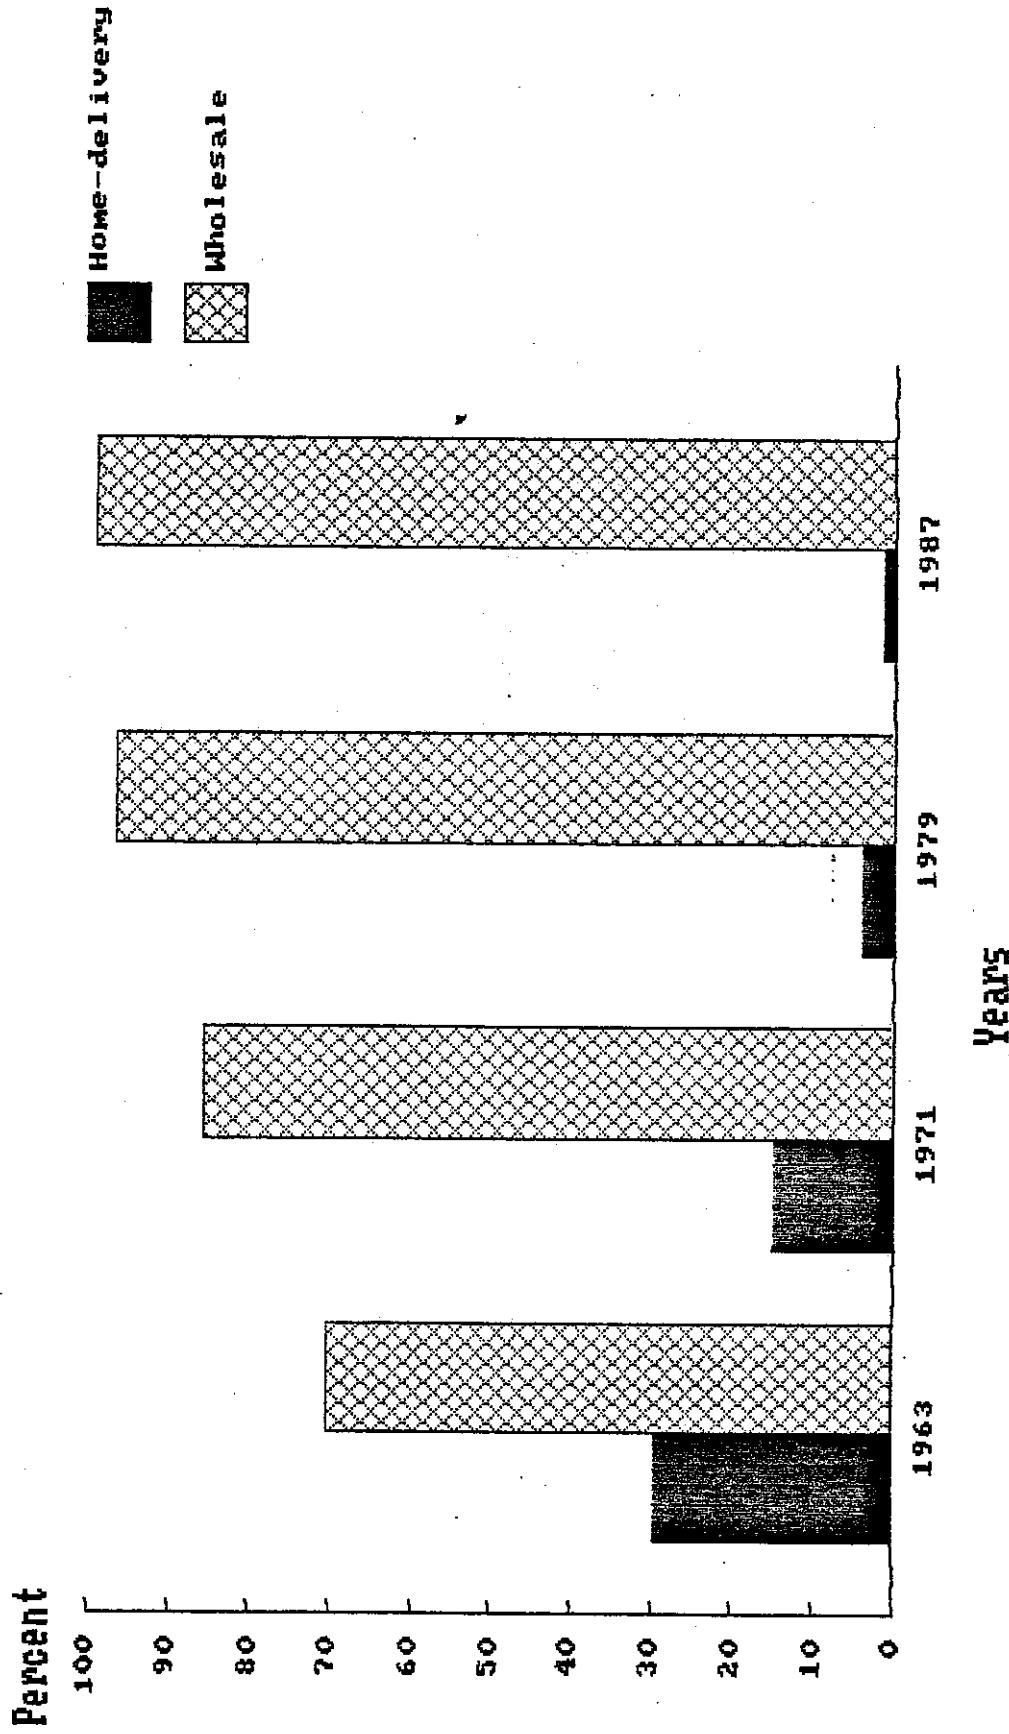

The following charts and tables provide historical information from past surveys and detailed information from the current survey. Information is presented for individual Federal milk order marketing areas, regional groups of these markets, and for all markets combined. Additional information is shown in several appendix tables.

* Less than one-half of one percent.

1/ Based on total sales including both wholesale and home-delivered.

2/ Number of markets for which complete data were available. See Appendix D for the Federal milk order markets included in current survey.

3/ Percentages represent metal cans and plastic bag-in-box containers in 1963; metal cans only, 1964 to date.

4/ Whole milk items include plain and flavored whole milk and miscellaneous whole milk products.

5/ Data not available.

6/ Lowfat and skim milk items include plain, fortified, and flavored skim and lowfat milk, buttermilk, and miscellaneous products.

7/ Whole milk items and lowfat and skim milk items combined.

* Data for plastic were not available. ** Represents sales made by fewer than three handlers which cannot be shown without revealing the volume of their individual business. Quantities are included in "all other sizes". 1/ Number of markets for which complete data were available. 2/ Based on total sales including both wholesale and home deliveries. Data for 1963-1975 include sales of whole milk items, lowfat and skim milk items, mixtures, cream items, and eggnog. Data for 1977 to date represent sales of whole milk items and lowfat and skim milk items only. 3/ Includes 5-10 quart containers; breakdown by type of container was not available. 4/ Quantities indicated under glass represent metal cans; under plastic represent mostly bag-in-box containers. 5/ Less than 500 pounds.

FOOTNOTES FOR TABLE 4

** Represents sales made by fewer than three handlers which cannot be shown without revealing the volume of their individual business. Quantities are included in "all other sizes."

1/ Based on total sales including both wholesale and home-delivered. See Appendix D for the Federal milk order markets included. 2/ Two and one-half gallon and larger containers under glass represent metal can, under plastic represent mostly bag-in-box containers. 3/ Whole milk items include plain and flavored whole milk and miscellaneous whole milk products. 4/ Lowfat and skim milk items include plain, solids added, and flavored lowfat and skim milk, buttermilk and miscellaneous products. 5/ Whole milk items and lowfat and skim milk items combined.

** Represents sales made by fewer than three handlers which cannot be shown without revealing the volume of their individual operations. These data are included in "all other sizes".

1/ Based on total sales including both wholesale and home-delivery.

2/ Two and one-half gallon and larger containers under glass represent metal cans; under plastic represent mostly bag-in-box containers.

3/ All the data were restricted--pertains to fewer than three processing plants.

* Less than 500 pounds.

** Represents sales made by fewer than three handlers which cannot be shown without revealing the volumes of their individual operations. These data are included in "all-other sizes".

1/ Based on total sales including both wholesale and home-delivery.

2/ Two and one-half gallon and larger containers under glass represent metal cans; under plastic represent mostly bag-in-box containers.

1/ Fluid milk products represents whole milk items and lowfat and skim milk items combined.

2/ Number of markets for which complete data were available.

3/ This breakdown was not available prior to 1977. Percentages may not add to total wholesale due to rounding.
4/ Generally, 11 or more stores (supermarkets, dairy and convenience) nationwide, primarily engaged in food retailing and either under common management, being franchised by a common company, or belonging to a common purchasing association.

5/ Nonchain food stores, nonfood stores (drug stores, gasoline stations, etc.), restaurants, hotels, hospitals, nursing homes, vending machines, and any other type of wholesale outlet.

6/ Does not include data for the New York-New Jersey marketing area for which these data were not available.

1/ Fluid milk products represent whole milk items and lowfat and skim milk items combined.

2/ Percentages may not add to total wholesale due to rounding.
3/ Generally, 11 or more stores (supermarket, dairy or convenience) nationwide, primarily engaged in food retailing and either under common management, being franchised by a common company, or belonging to a common purchasing association.

4/ Institutional represents sales made through military installations and public schools, colleges and universities.

5/ All other wholesale represents nonchain food stores, nonfood stores (drug stores, gasoline stations, etc.) restaurants, hotels, hospitals, nursing homes, vending machines, and any other type of wholesale outlet.

6/ Restricted, represents data for fewer than three handlers. Data are included in all other wholesale.

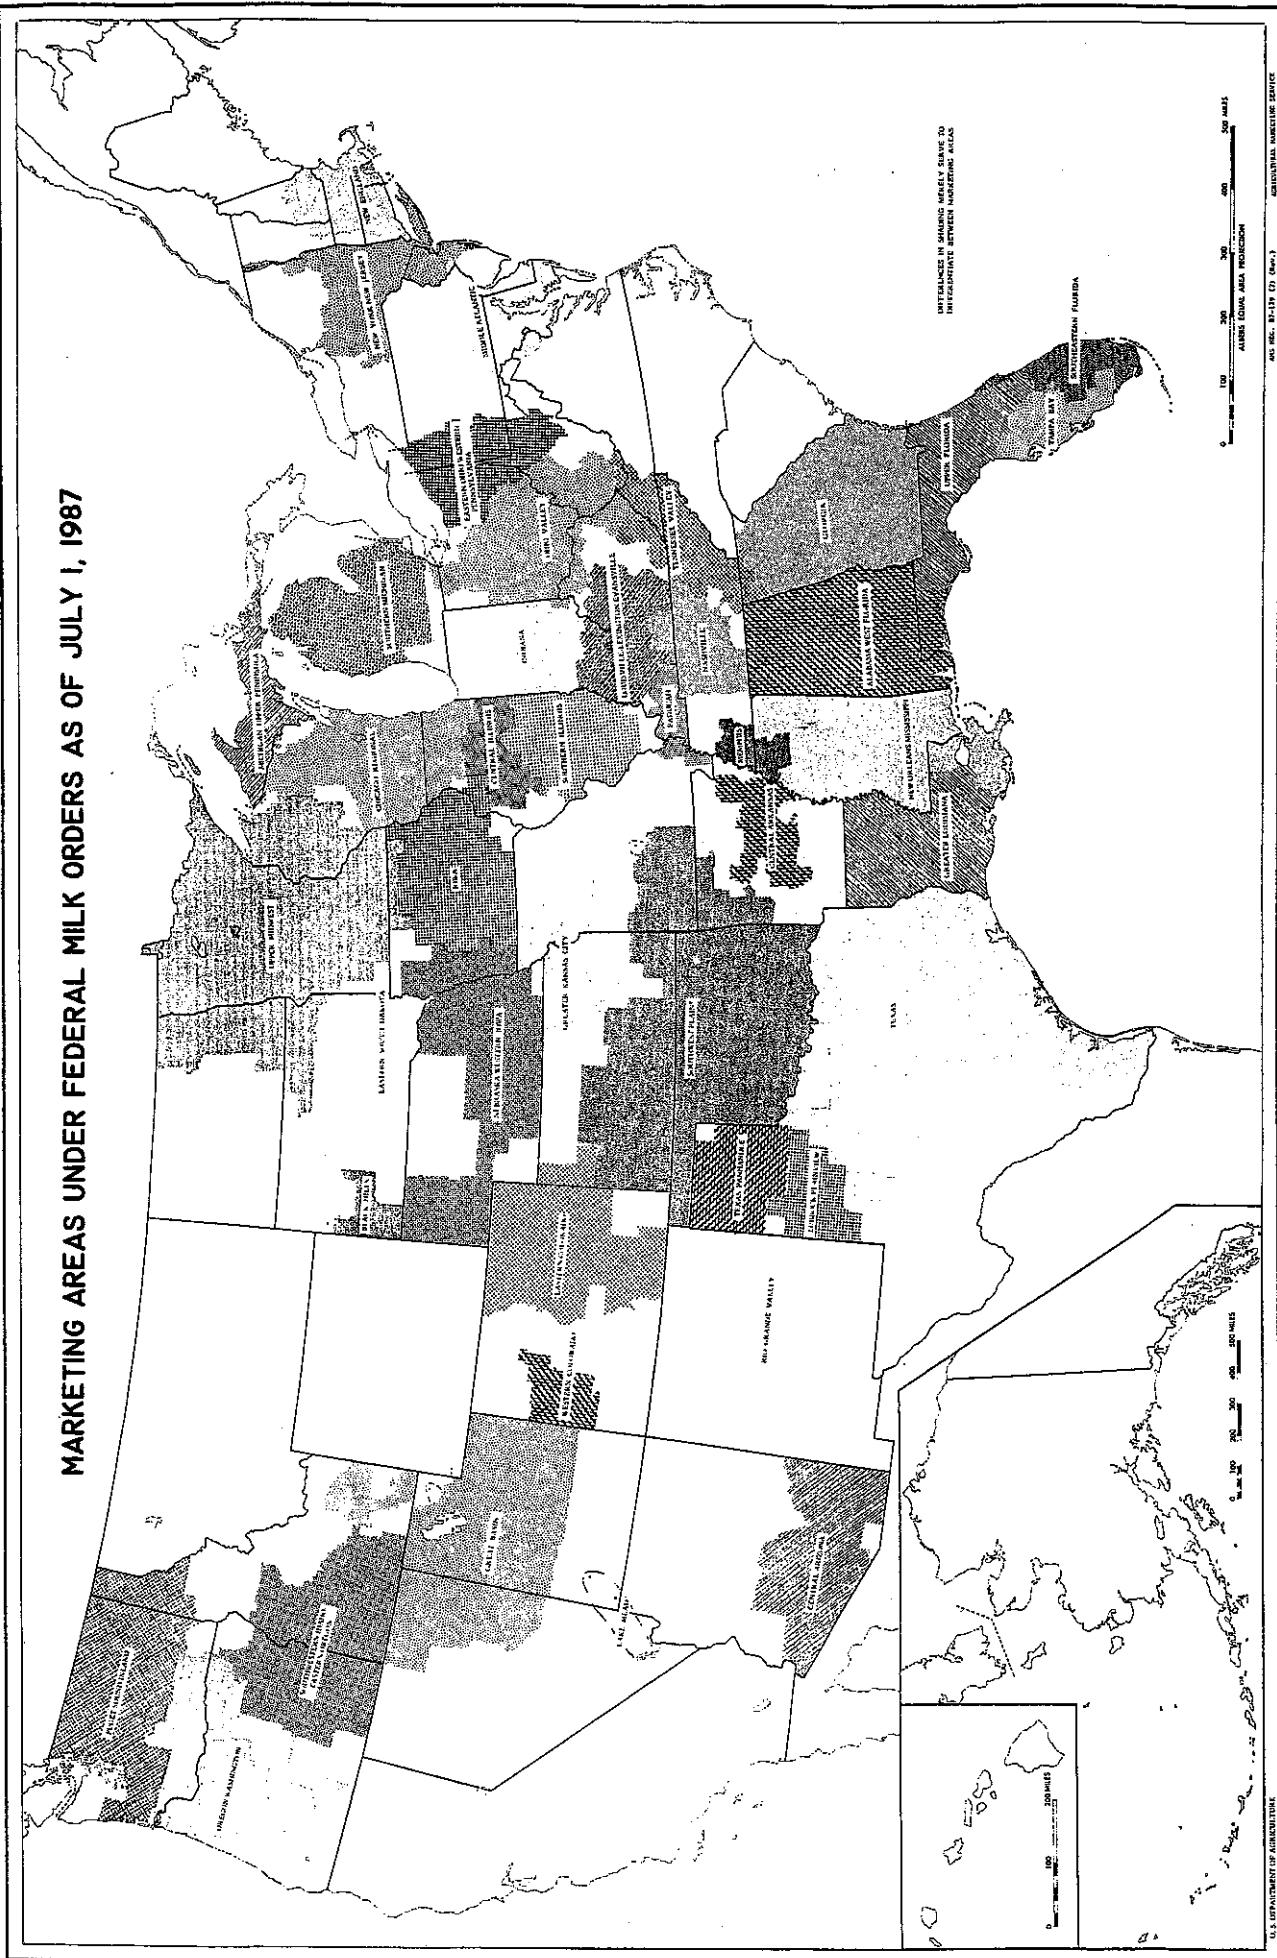

7/ Restricted, represents data for fewer than three handlers. Data are included with schools.

8/ Restricted, represents data for fewer than three handlers. Data are included in supermarkets.

9/ Includes Black Hills, Central Illinois, Eastern South Dakota, Lake Mead, Lubbock-Plainview, Michigan Upper Peninsula, Nashville, Paducah, Texas Panhandle, and Western Colorado marketing areas for which all data were restricted. Each method total includes restricted data which were not shown for individual marketing areas.
